

Appl. No. 09/712,632  
Amendment. dated May 28, 2003  
Reply to Office Action of February 12, 2003

PATENT

Amendments to the Specification:

Please replace the paragraph beginning at page 1, line 4, with the following rewritten paragraph:

21  
-- This application is related to, and incorporates by reference in its entirety, application serial number 09/712,383, filed November 13, 2000, attorney docket number 019680-000400US.--

Please replace the paragraph beginning at page 12, line 20, with the following rewritten paragraph:

22  
-- The tag or tags from the cache lines identified by the index signal are read in act 830, and are compared to the above calculated tag in act 840. If there is a match, a hit signal is generated act 850, and the texel may be read using the offset information, act 860. If there is no match, a miss signal is generated, 870, and the cache line is updated in act 880. Once the cache line is updated, the texel may be read using the offset signal, act 860. The updating of a cache line, act 880 is the subject of the above referenced related application 09/712,383, attorney docket number 019689-000400, filed November 13, 2000.--
